

Introducing Liberate

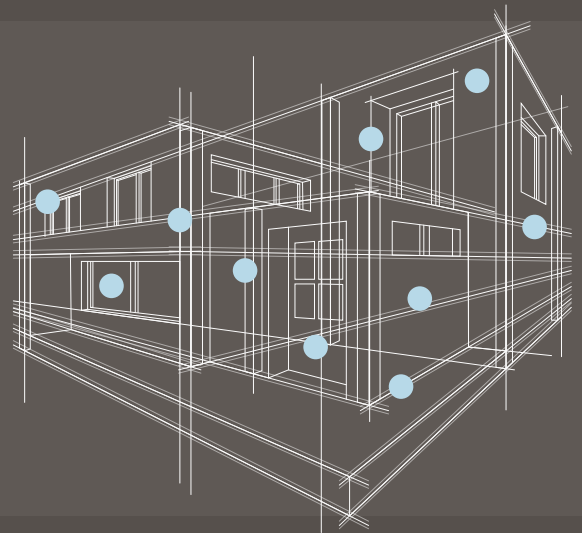

Designed to enhance and empower the lives of seniors living independently, while providing peace of mind for loved ones and caregivers.

This innovative low-cost, low complexity approach goes a long way to resolving real life problems that both seniors and their caregivers face on a daily basis. We have integrated many technologies and advanced 4D Radar detection to create a high value user experience, whilst proudly boasting no cameras, listening devices or wearables. seniors can feel free, independent and comfortable in their own home!

● The Hub

This technical foundation block consists of a proven communication hub that constantly communicates with a suite of sensors strategically placed around the home. The sensors work with Zigbee, Zwave, Bluetooth, Wi-Fi and other IoT protocols.

● The Revolutionary Intelligent Sensors

Our eco-system of sensors is a blend of reliable well-tested IoT devices that perform under all conditions, together with our cutting edge WarmSense Technology TM. We utilize 4D Radar sensors to reliably monitor, measure and detect abnormal events in the home.

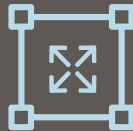

4D Radar
Sensors that
are hyper
accurate and
non-intrusive

Sensing Falls
and Presence
of Multiple
People in
the area

Sensing whether
a person is
sitting,
standing, or
laying down

Monitoring a
large room
and all the
activities
within it

Measuring
how long a
person
has been in
the room

Differentiate
between
humans,
pets and
robot-vacuums

With no
cameras in
place,
Privacy is stictly
guaranteed

Your Mom could not tell you that she had fallen but our sensors knew!

An immediate high-priority alert directly notifies family members, care givers or emergency units to ensure seniors get the help they need when they need it.

● Cloud Based Engine

The brain of Liberate, is our cloud-based engine. With advanced principles of data science, machine learning and sophisticated algorithms, our system analyses situations and alerts others of abnormal events, as if they were present in the house with you. It receives real-time data from the home-based sensors, which are enhanced by our learning capabilities. The system then dynamically evaluates the data against a set of parameters which you personally dictate and provides others with the appropriate alerts.

● The Heart

'The Heart of Liberate' is our simple and easy to use tablet-based application that is guaranteed to put a smile on your face. Along with our 'Companion Liberate Mobile App', all seniors can live a vibrant life the way you would want them to.

Monitoring and Response

Liberate is designed to monitor, detect and alert desired family members and associated care givers, when abnormalities are detected within their household. Our customer care center is available around the clock to provide additional support when needed.

Family Tree Communication

Through the 'Family Tree' feature, 'Liberate' allows you to stay connected and communicate easily with up to 10 relatives or friends via on-line chats, video calls or e-mails.

Lifestyle and Support

While focusing on the senior's personal health and regular activities, we are able to provide daily tips and advice on healthy living, nutrition and exercise. Additionally, through our 'Partners Tab', you can order essentials online, book a service and enjoy 'Partner Promotions' from the comfort of your own home.

Our attention was also drawn to the lack of lifestyle content that was available to seniors. Therefore, we will also be delivering a full set of products through our communications tablet that will enrich the life of the senior. In addition, topics like health, well being and culinary creativity will be addressed. Our resident chef will be providing daily meal suggestions and our medical doctor will be watching the calories and promoting healthy fun food along with exercise and activity tips. Our team will make sure that this exchange is pleasurable, focused and invigorating and will have an underlying tone that will promote vibrancy, safer living conditions and greater peace of mind for all concerned.

Customer Solution Desk

We have deployed a very user-friendly 'Help Desk' facility that can be accessed by all subscribers 24 hours a day. We have omitted all multi-level computer generated help menus. With us its just click, call and chat! Our trained service ambassadors will be there to guide our clients and get their issued resolved.
