Liberate
LITE

Imagine a system that would
allow Senior family members
the sovereignty of being
independent but
simultaneously afforded
others an unintrusive
watchfulness with freedom
from worry and anxiety.

We have taken intelligent, interactive technology and made it simple. A mobile application allows for simple yet significant interaction that seniors can operate via the touch of the screen.

Who is going to contact you within seconds when a senior family member falls?

Fall Detection

Our vigilant Liberate Lite system is linked to the mobile applications of designated / associated family members or care givers creating an **immediate alarm** as soon as a need arises.

Family Tree Communication

A Family Tree depicting **up to 10 family members** allows for ease of access to a variety of digital communication methods.

Seniors can feel free, independent and comfortable in their own home!
